

42. Periodic analogues of the Euler-Maclaurin and Poisson summation formulas with applications to number theory (with Lowell Schoenfeld), Acta Arith. 28 (1975), 23–68.

47. Classical theorems on quadratic residues, L’ Enseignement Math. 22 (1976), 261–304.

49. Modular transformations and generalizations of several formulae of Ramanujan, Rocky Mountain J. Math. 7 (1977), 147–189.

88. Ramanujan-100 years old (fashioned) or 100 years new (fangled)?, Math. Intell. 10 (no. 3) (1988), 24–29.

96. Some asymptotic formulas for \( q \)-series found in Ramanujan’s third notebook and “lost notebook,” Indian J. Math. 32 (1990), 179–185.

104. On a certain theta-function in a letter of Ramanujan from Fitzroy House, Ganita 43 (1992), 33–43.

123. The remaining 40% of Ramanujan’s lost notebook, in Number Theory and its Applications, Surikaisekikenkyuusho Kokyuuuroku, No. 1060, RIMS Kyoto University, Kyoto, 1998, pp. 111–118. (Unrefereed Paper)

153. Ramanujan’s contributions to Eisenstein series, especially in his lost notebook (with A. J. Yee), in Number Theoretic Methods - Future Trends, C. Jia and

177. A reciprocity theorem for certain $q$-series found in Ramanujan’s lost notebook (with S. H. Chan, B. P. Yeap, and A. J. Yee), Ramanujan J., to appear.

178. Ramanujan’s congruences for the partition function modulo 5, 7, and 11, submitted for publication.

183. Partition identities and Ramanujan’s modular equations (with N. D. Baruah), submitted for publication.

184. Partition identities arising from theta function identities (with N. D. Baruah), submitted for publication.

185. Solving Ramanujan’s differential relations for Eisenstein series via a first order Riccati equation (with J. M. Hill and T. Huber), submitted for publication.
