- Sit in your assigned seat (circled below).
- Do not open this test booklet until I say *START*.
- Turn off all electronic devices and put away all items except a pen/pencil and an eraser.
- Remove hats and sunglasses.
- There is no partial credit on multiple-choice questions. For all other questions, you must show sufficient work to justify your answer.
- While the test is in progress, we will not answer questions concerning the test material.
- Do not leave early unless you are at the end of a row.
- Quit working and close this test booklet when I say *STOP*.
- Quickly turn in your test to me or a TA and show your Student ID.

FRONT OF ROOM – 141 Wohlers Hall

1. (10 points) If $f(x) = x^9 \arctan(x) + x^5 \arcsin(x)$, then find $f'(x)$.

2. (10 points) If $w(t) = \cot\left(\frac{\ln(t)}{t^9 + 3t}\right)$, then find $w'(t)$.

3. (10 points) If $p(\theta) = \csc^8\left(\sqrt{e^{5\theta} + 3}\right)$, then find $p'(\theta)$.

4. (10 points) Find the equation of the line tangent to the curve at its positive x -intercept.

$$x^5y + 25 = x^2 + y^{42}$$

5. (10 points) The slope of the tangent line at each point on the graph of $y = f(x)$ is equal to seven times the value of its y -coordinate. Given that $f(6) = 5$, determine a formula for $f(x)$.

6. (10 points) List each interval upon which the graph of $f(x)$ is increasing and each interval upon which the graph of $f(x)$ is decreasing.

$$f(x) = \frac{1 + 13x - x^2}{e^{13x}}$$

7. (10 points) Evaluate the following limit. You must justify and simplify your answer.

$$\lim_{x \rightarrow \infty} \frac{10 \arctan(3x) - 5\pi}{6 \arctan(2x) - 3\pi}$$

8. (10 points) A polynomial $f(x)$ has the following second derivative.

$$f''(x) = -5x^{22}(x-2)^{35}((x+20)^2 - 484)$$

(a) Determine the largest open interval upon which the graph of $f(x)$ is concave up.

(b) Find each x -value at which the graph of $f(x)$ has an inflection point.

9. (10 points) For each $x > 0$, a triangle is formed with vertices $(0, 0)$, $(x, 0)$ and $(x, f(x))$ where $f(x) = 2x^{83}e^{-2x}$. What is the value of x which results in the triangle of largest area?

10. (10 points) The volume of a sphere is increasing at a rate of $42\pi \text{ cm}^3/\text{sec}$. How quickly is the radius increasing when the diameter is 25 cm ?

Students – do not write on this page!

1. (10 points) _____

2. (10 points) _____

3. (10 points) _____
