Exam 3 Questionnaire
Math 221 AD2

Name:

Instructions: Read through the reason codes below. These are explanations for why you either missed or received points on the exam. Then on the next page, for each problem on the exam write your score and the numbers of the reason codes that most closely correspond to why you think you missed or received points on the problem. You may use multiple codes per problem. There is space after each problem in which you can leave comments.

Reason Codes:
If you missed points:

1. If I had more time, I wouldn’t have missed these points. In other words, I either didn’t have time to thoughtfully answer this question at all, or I made careless errors such as misreading the question or arithmetic or algebra errors.

2. If I had my notes, I could have done this problem.

3. Even with my notes I wouldn’t know how to do this problem.

4. I thought I knew how to do this problem and thought I answered it correctly, but apparently I misunderstood the concept or memorized a formula (or definition or theorem, etc.) incorrectly.

5. I knew how to do this problem and wouldn’t change my answer if I had more time, but I wasn’t expecting the grader to be so picky. This includes situations where you didn’t show enough work or didn’t show the work the grader was expecting.

If you received most of the points:

6. I knew how to do this problem immediately.

7. I had to think a bit at some points, but I eventually figured out how to do this problem.

8. I didn’t know how to do this problem, but I guessed and got lucky.

Other Questions:

1. How did you study for this exam?

2. Do you feel your studying was effective? Why or why not?

3. Were time constraints a major factor in your ability to study?

4. Were you happy with your score on this exam? If not, is there anything I can do to help you with the next exam? What can you do to prepare yourself for the next exam?
