Participation Guideline

In the first class we discussed some guidelines on how we should behave in class. I summed them up in this form so that it can serve as a reminder. Don’t forget this is not exhaustive and they are other things you have to pay attention to.

**Should Do:**
- Work hard
- Share your ideas
- Participate in discussion
- Prepare for class
- Inform when missing class
- Have an open mind towards math
- Go to office hours
- Come to class
- Do homework

**Shouldn’t Do:**
- Don’t be late
- Don’t sleep
- Don’t text
- Don’t get distracted
- Don’t be afraid to share ideas
- Don’t procrastinate
- Don’t work on other stuff
- Don’t be disrespectful
- Don’t slack off

Here is also a short list of do’s and don’ts for me:

**Should Do:**
- Be responsive if you have questions
- Help you solve your worksheets
- Grade and return your work swiftly
- Make good worksheets and mock exams

**Shouldn’t Do:**
- Don’t give you direct answers
- Don’t determine your 231 grade
- Don’t make mean worksheets and quizzes
- Don’t talk about your homework
