For your last homework, you must prepare a well-made cheat sheet for your final exam!
This is to better prepare yourself for the final.
I will check your cheat sheet the night of the exam (Dec. 14, 7pm), and you will need to turn it in with the exam.

To get full points:

1. Your cheat sheet must be 1-2 (one-sided) pages long. You can also do a single double-sided sheet.
2. You must make your own cheat sheet! You cannot copy a friend’s.
3. Your cheat sheet should have the following sections (and more if you want):
   a. Graph theory
   b. Voting systems
   c. Cake-division
   d. Probability
   e. Game theory
   f. Modular arithmetic
